

a2/kmeans/make_on_queue.sh

```
1  #!/bin/bash
2
3  ## How to run (example)
4  ##  qsub -q parlab make_on_queue.sh
5
6  ## Give the Job a descriptive name
7  #PBS -N make_kmeans
8
9  ## Output and error files
10 #PBS -o make_kmeans.out
11 #PBS -e make_kmeans.err
12
13 ## How many machines should we get?
14 #PBS -l nodes=1:ppn=1
15
16 ## How long should the job run for?
17 #PBS -l walltime=00:10:00
18
19 ## Start
20 ## Run make in the src folder (modify properly)
21
22 cd /home/parallel/parlab05/a2/kmeans
23 make
24
25
```
